EXPERIENCE

Web Development Student | General Assembly | San Francisco

June 2017 - September 2017

Involved in all aspects of developing web applications including front-end design, back-end functionality, and database management. Focused on one week sprint projects developed individually and in teams.

Projects

Kumu: A rails note sharing app created in a team of four. The intended purpose of this app is to facilitate collaboration between students.
https://kumuapp.herokuapp.com/

Wayfarer: A MERN stack application that lets users share their travel experiences. Created in a small team working in a one week sprint.
https://github.com/ryan-barrett/Wayfarer

FixingSanFran: Fixing SanFran is a city planning rails app created to encourage civic engagement. https://fixing-sanfran.herokuapp.com/
