Languages: Javascript, Ruby, Python, HTML5, CSS3, SQL, Git

Frameworks & Databases: Rails, Node.js, Mongoose, Express, React, MongoDB, PostgreSQL

Other: AJAX, Bootstrap, Materialize, Heroku, Github, jQuery, Handlebars, RSpec

EXPERIENCE

Web Development Student | General Assembly | San Francisco

June 2017 - September 2017

Involved in all aspects of developing web applications including front-end design, back-end functionality, and database management. Focused on one week sprint projects developed individually and in teams.

Projects

Nomad: A MERN stack application that lets users share their travel experiences. Used MongoDB, Express, and React. https://nomad-.herokuapp.com/

FixingSanFran: Fixing SanFran is a city planning rails app created to encourage civic engagement, and allow users to bring public issues to the attention of their representatives. https://fixing-sanfran.herokuapp.com/

Kumu: A rails note sharing app created in a team of four. The intended purpose of this app is to facilitate collaboration between students. https://kumuapp.herokuapp.com/
